

LUXURY LIGHTING

FAMILY OF BRANDS

What is Luxury Lighting?

Luxury lighting is digitally addressable lighting that can change the mood and atmosphere of a room. It can manipulate and effectively set the mood and focus of the viewer, creating small areas of light to make a room more pleasant and inviting by placing individual accents in the foreground or background. It can also provide human centric lighting that mimics the natural daylight which drives our body's functions. It enhances human performance, comfort, health and well-being. Atmospheric luxury lighting fixtures can change our mood and emotions through different types and colors of lighting. Mood lighting is especially effective and important when planning industrial lighting and when you want to create a specific atmosphere in a space. Whether it's a private home, office, yacht, jewelry store or restaurant, Ui Supplies offers a wide range of luxury lighting solutions.

EXPLORE

ELEMENT

by Tech Lighting®

ELEMENT offers a wide range of specification-grade recessed lighting, engineered to deliver critically specified light for any environment. The innovative ELEMENT downlight series maintains an LED agnostic platform, easily adapting to today's most relevant LED offerings. This flexibility empowers the design community to select an LED solution that best fits the design criteria and performance preferences for a given project.
