Lutron is now offering a 2 ½ day instructor-led, virtual RadioRA 2 Advanced Qualification training. This training is designed to build a stronger foundation and understanding of Level 1 training concepts. It covers advanced concepts found in the RadioRA 2 Inclusive software, allowing attendees to successfully sell and commission larger homes.

Advanced concepts covered include:

- Networking
- Commissioning 2 main repeater systems
- Timeclock and HVAC programming
- GRAFIK T solutions, wallbox power module
- Third-party integration

What you get

- Access to the RadioRA 2 Inclusive software, enabling you to complete larger projects with 2 main repeaters and up to 200 devices
- RadioRA 2 Training Kit — **over $1,780 worth of product!** — for a hands-on training experience. Yours to keep. (See the next page for kit details.)

How to get started

- **Prerequisite:** Complete RadioRA 2 Level 1 Training (live or online)
- **Register online** at lutron.com/lcionline
- Pay **$650 (USD) registration fee**

 For more information contact our lighting control institute (LCI) at training@lutron.com.

After you register

- Keep a lookout for a **registration confirmation email** with information regarding crucial next steps

To prepare for class, make sure you have a:

- high-speed internet connection
- Windows laptop or Windows desktop computer
- microphone and headset

Level 2 Training Kit Package

Product	Model Number	Product Description
	RR-CONNECT-PKG	**(1) RadioRA 2 main repeater.** Extend the range of signals sent between devices. Repeaters ensure error-free communication between system components and prevent interference from neighboring systems. **(1) Connect Bridge.** Allows for convenient and intuitive control of RadioRA 2 via the Connect app and allows integration with other technology such as voice control and audio systems. Use the Connect app to control lights, shades, temperature, audio, and keypads from a mobile or wearable device, from anywhere in the world.
	RRD-3LD-SW	**(2) RadioRA 2 lamp dimmers.** Function much like standard lamp dimmers but can be controlled as part of the system.
	RR-15APS-1-WH	**(1) RadioRA 2 appliance module.** Switches 15 A of general-purpose loads and features Lutron's patented Softswitch technology to prevent relay contacts from arcing, extending the average life of the switch.
	RR-T5RL-SW	**(1) RadioRA 2 seeTouch tabletop keypad.** An elegant way to control lights, shades, motorized screens, and many other devices.
	LRF2-OCR2B-P-WH	**(1) Radio Powr Savr occupancy/vacancy sensor.** Wireless, battery-powered, passive infrared sensors that automatically control lights via RF communication to compatible dimming and switching devices.
