

SONOS

Sonos Ace

Sound like you've never felt

Meticulously engineered and tuned by the most discerning ears in the industry, Sonos Ace surrounds you in the highest-fidelity audio for the deepest connection to sound.

Tune out or in to your surroundings

World-class Active Noise Cancellation (ANC) blocks external sounds for maximum immersion. Switch to Aware mode to hear what's going on around you.

30 hours of battery life

Listen or talk for up to 30 hours even with ANC enabled. Rapid charging gives you 3 hours of playback in 3 minutes when using the USB-C to USB-C cable.*

*Approximately 3 hours to full charge.

Personal surround sound

Swap TV audio from a compatible Sonos soundbar to Sonos Ace with the press of the button for a singular home theater experience with dynamic head tracking.

All-day comfort

The lightweight design adjusts for a perfect fit and exceptional acoustic seal. Plush memory foam and buttery soft vegan leather minimize pressure so you can listen comfortably for hours on end.

Wear detection

Sonos Ace will automatically pause audio content when removed from your ears and resume when put back on.

Experience spatial audio, including Dolby Atmos, with one-touch to swap audio to and from the Sonos Arc soundbar. Sonos-built software features including dynamic head tracking and True Room tunes the experience, optimizing it for each unique user and space.

Whether you're watching movies or playing games in your home theater, Ace uses the full power of a multi-channel, room-filling mix - like Dolby Atmos, 7.1.4 or 5.1 - to make it sound like you're sitting in a Dolby Atmos theater.

Tech Specs

Custom-designed 40 mm dynamic driver in each cup.

Extendable headband and stays securely in place.

Eight microphones for noise control and voice targeting.
