INTELLIGENT
POWER

We've combined multiple features into one unique power distribution unit that fits behind your wall-mounted TV. This 3-outlet smart power controller delivers surge protection, remote control, smart home integration, and more. The 3 individually controllable outlets give you self-healing, automatic reboot, and power metering for total power management. The intuitive MAVbase app provides a simple user experience for easy management of your connected devices.

Specifications:

OPERATING TEMPERATURE: 14˚F - 104˚F (-10˚C - 40˚C)

SURGE PROTECTION: 2380 Joule

EXTERNAL ANTENNA: Yes

OUTLETS (TOTAL): 3 outlets

SWITCHED OUTLETS: 3

AC INPUT OUTLET: IEC C14, 15A circuit, product UL rating 12A

CIRCUIT BREAKER (COP): Yes (rear)

CORD LENGTH: 6ft

SAFETY CERTIFICATIONS:
UL/CUL, FCC. UL 62368-1+UL 498+1449 with CSA 269.3+UL 1283, FCC Part15B+ICES-003, FCC ID/ISED (wireless device FCC)

WARRANTY: 5 Year Limited

FEATURES

- 3 individually controlled outlets
- Wall/Surface Mountable
- Self-Healing functions for network-connected equipment
- 2380 Joule Surge Protection (L-N Protection)
- Web and Mobile app for remote management and notification
- IP automation integration
- 120V/12A Rating

Self-Healing Relays for Automatic Rebooting

The smart outlets have contact closure and sensing relay capabilities, which means they can automatically reset outlets that are not on the network. Automate an outlet reset process so you can experience your smart home technology without inconvenient interruptions requiring service calls or visits.

Prevent Technical Issues Before they Happen

Reduce service calls by programming connected devices to auto reset on an ongoing schedule.

Integrate with the Best

Big Dog Power products are "automation-ready" for Control4 and Crestron, with more platforms coming soon so you can continue managing your devices through the same control system app.

Manage Everything from One App

An intuitive app design provides a simple user experience for homeowners to manage connected devices. Integrators can monitor all of their clients within the MAVbase app with the option of either remote or direct access. Direct access allows integrators to log in and program the PDU without internet.
