

SIMPLE • SMART • AFFORDABLE

# C2K1

## CUSTOM CONTROL KIT

The perfect start to a smart home or office, the C2K1 Custom Control Kit delivers powerful control and automation of AV, lighting, security and more. Designed with incredible flexibility, the kit offers full customization for simple operation of today's electronics and easy expansion for tomorrow's.

### Powerful Automation

XP-3 Advanced Control Processor features an integrated 2.4GHz RF ZigBee® Transceiver and control options including Ethernet, RS-232, infrared, relays and voltage sensing.

### Simple Control

Pro24.z remote control's 2.4-inch color LCD touchscreen and buttons are fully customizable to enable ultra-intuitive control.

### Unlimited Mobility

RTiPanel app allows the convenience of control via Apple iOS® and Android™ smart devices, as well as Windows® PCs (kit includes unlimited RTiPanel app license).

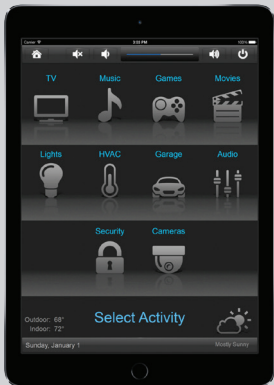

# C2K1 Custom Control Kit

## KEY FEATURES

### Pro24.z Remote Control

- Two-way control using 2.4GHz (Zigbee®) and RTI XP-3 Control Processor.
- Full color, 2.4" TFT touchscreen display.
- Ergonomic design permits effortless, one-handed operation.
- Transmits IR and RF (or both - on a single button press!).
- Five-way joystick and forty-eight backlit hard buttons.
- Tilt switch can automatically turn on the backlight when picked up.
- System includes a Lithium-Ion battery and docking station.
- Completely customizable and programmable.
- Extremely wide IR transmitting frequency range.

### RTiPanel App

- Two-way control from AV, lighting, security, climate, and more!\*
- Fully integrate Apple iPad®, iPhone®, iPod Touch® and Android™ devices and Microsoft Windows PC's.
- Completely customizable graphical interface.
- Programmed using same Integration Designer software.
- Supports creation of both portrait and landscape views.
- Supports local connection via WiFi®, and off-site access via WiFi® or cellular data (if available), with automatic switching.\*
- C2K1 Custom Control Kit comes with an RTiPanel unlimited license pre-installed on the XP3 control processor.

\* NOTE: Off-site access and two-way control requires an XP series control processor.

### XP-3 Control Processor

- Supports IP and RS-232 based two-way drivers.
- One multi-purpose I/O port for RTI power sensing and communications modules.
- Two IR output ports with variable output.
- Two assignable voltage sense inputs.
- Two programmable relay outputs.
- One two-way RS-232 port for bi-directional communication with supported devices.
- Integrated 10/100Base-T Ethernet port for programming, control and two-way communication with compatible devices.
- Integrated 10/100Base-T Ethernet port supports Power-over-Ethernet (POE) Class 3.
- Built-in astronomical clock for time-based events and sleep timers.
- Built-in 2.4GHz ZigBee® RF transceiver module and removable antenna.
- Configurable for communication with RTI in-wall products.
