

Perfect Square

SquareFrame Downlighting System

The SquareFrame is a breakthrough addition to the DMF Downlighting family. It takes the OneFrame's exceptional flexibility, simplicity and performance and reimagines it in a square format that delivers perfect alignment every time.

All the benefits of the OneFrame. Squared.

The SquareFrame is the perfect foundation for a fully interchangeable system of modules and trims that give you endless choice over how your lighting works and looks. The housing is drastically smaller than the competition so it fits into the most physically restrictive environments.

Precision installation, now made faster + simpler

DMF's engineers understand how challenging it can be to install a square downlight perfectly straight and perfectly aligned. That's why they've incorporated a suite of features that work together seamlessly to give you a flawless fit more quickly and with less hassle.

Set pin keeps housing aligned perfectly from the factory, and enables effortless resets

Compact size greatly simplifies installation and fit compared to 12" x 16" housings

Innovative bar hangers make horizontal adjustment easy, and locks in place with a screwdriver

Full rotation and side-to-side translation make getting the right placement a snap

Indents on all sides for laser or string alignment

Tool-tree height adjustment keeps housing flush with the ceiling plane

When perfection matters

You need a housing that can do it all: up and down, side to side, with 90 degrees of rotation and lateral translation. You need options and you need fine-tuning. You need a SquareFrame.

Built-in play in our trims lets you precisely set final trim angle

Modularity: A stunning range of results, one product family

One SquareFrame can illuminate a whole project with your choice of light and aesthetics options. Select from General (DRD2), Apex Series (DRD2X), and Adjustable (DRD4) modules that deliver exactly what your project demands.

	DRD2 General LED Downlight	DRD2X Apex Series LED Downlight	DRD4 Adjustable LED Downlight

Ratings + options

The SquareFrame has all the ratings you need for a wide variety of residential and commercial projects. These ratings mean that you can be sure your project is up to code and ensures that the people who use your building are safe and comfortable.

-  Insulation Contact (IC) Rated
-  STC/IIC Sound Rated
-  ASTM E283 Certified Air Tight
-  Code compliant for use in fire-rated assemblies up to a maximum of 2-hours

Emergency ready

The SquareFrame's emergency ready version offers additional features that make it more practical without changing its discrete look. The Emergency Driver runs off a self-contained battery that can change mounting positions for maximum flexibility while an integrated test switch on the trim maintains a seamless ceiling design.

-  Emergency

Trims that aren't an afterthought

The best way to see what makes SquareFrame trims unique is simply by holding them in your hands. Then you can appreciate the meticulous effort that we put into them, from the quality and heft of the materials to their sophisticated, timeless design.

Fine tuning for a flawless finish

Built-in play in our trims allows you to precisely set the final trim angle, and a lip on the trim ensures a perfect seal with the ceiling, eliminating light leak.
