DemoPad Resources Guide

WyreStorm

Overview

The following guide provides instruction on how to import programming resources for use with DemoPad products. These resources contain drivers/command sets for WyreStorm equipment along with popular 3rd-party AV devices and sources.
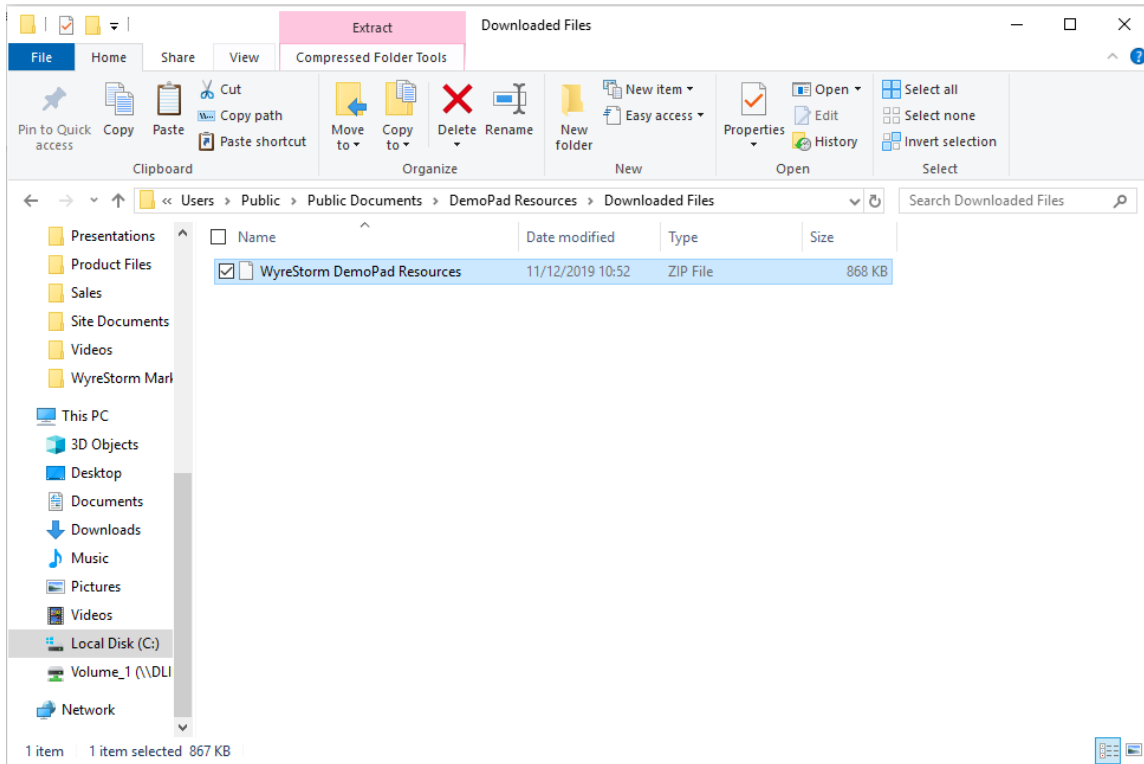

Before You Begin

Before proceeding with the steps provided in this document ensure that the following items are on hand or completed.

Latest version of DemoPad Designer software with a valid license key .... ☐

Centro hardware gateway (CENTRO-C, CM or 8M). .... ☐

Importing Resources

1. Download the WyreStormDemoPadResources.zip file from wyrestorm.com
2. Ensure that DemoPad Designer is closed and navigate to the DemoPad resources folder. The default directory is:
   C:\Users\Public\Documents\DemoPad Resources\Downloaded Files
3. Copy the WyreStormDemoPadResources.zip into this directory. Do not unzip the files, DemoPad Designer will auto-extract the contents of the zip file.

North America: 844.280.WYRE (9973) | UK/EMEA: +44 (0) 1793 230 343
Email: Support@WyreStorm.com

4. Once the zip file is copied, open DemoPad Designer. If done correctly, you will be prompted with a message stating a new file has been detected and asking permission to extract the contents. Press Ok to continue.

Selecting a WyreStorm Device

When the extraction is complete, you will then be able to access all WyreStorm devices. To choose a WyreStorm device navigate to **Project Properties > New Device (Select Down Arrow) > WyreStorm**
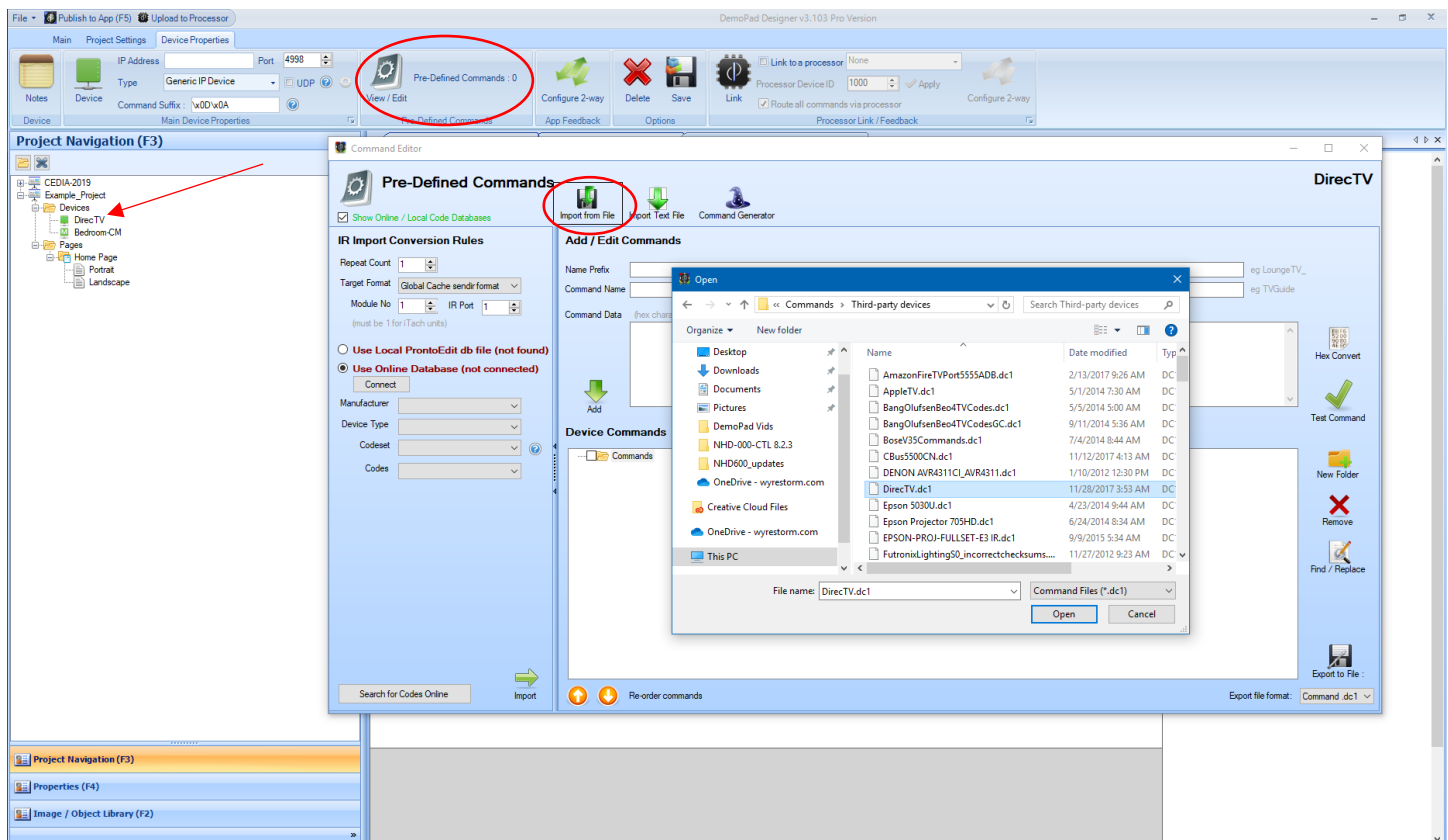

North America: 844.280.WYRE (9973) | UK/EMEA: +44 (0) 1793 230 343
Email: Support@WyreStorm.com

3rd-Party Devices

Also, part of the DemoPad Resources are drivers/command sets for 3rd-party equipment. To add a command set to control a 3rd-party device perform the following.
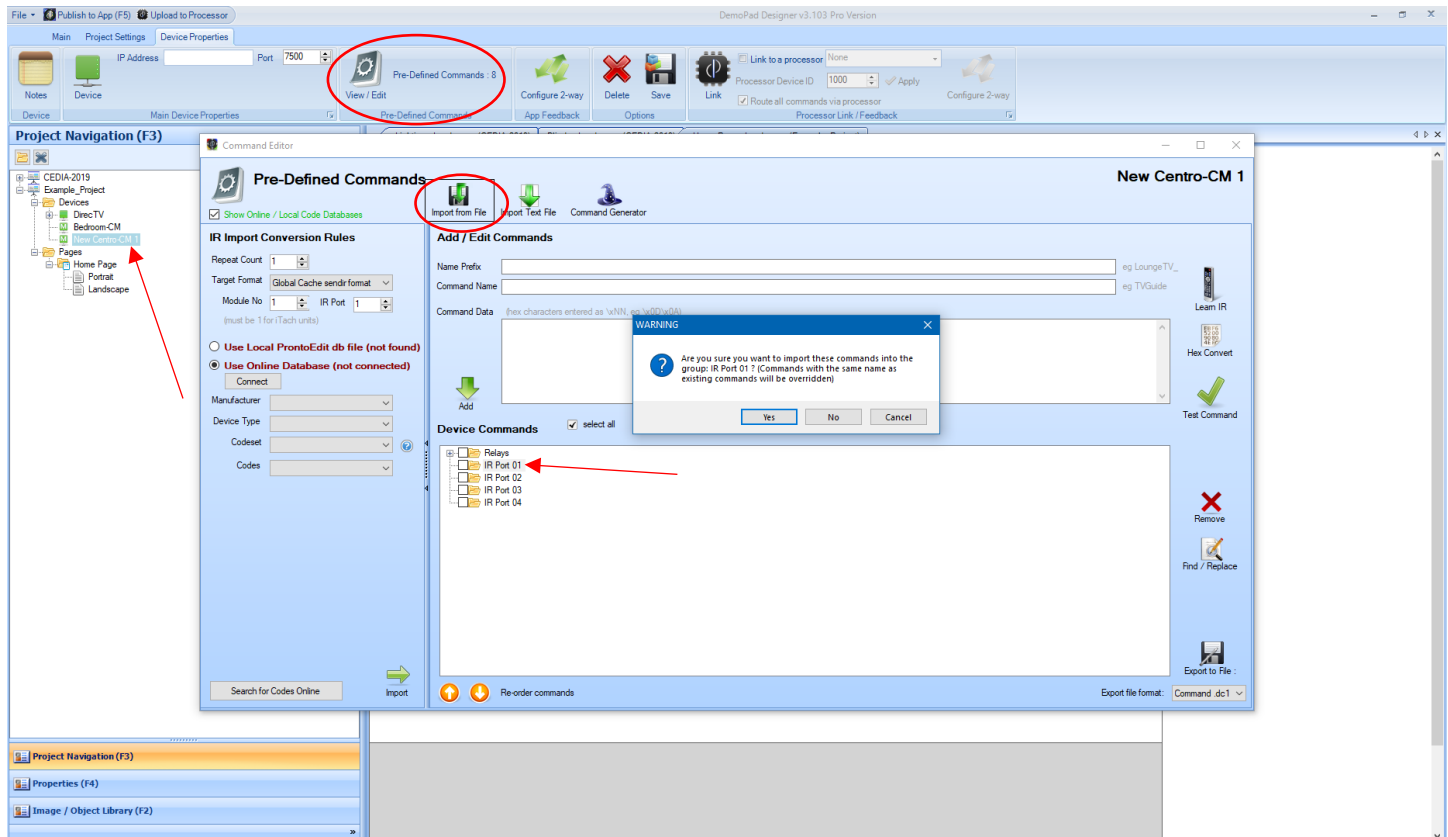

Controlling a 3rd-party device via LAN

1. Navigate to **Project Settings > New Device (Click Button)**
2. Once the New Device has been added select it from the Project Navigation menu at the left. Then navigate to **Pre-defined Commands > Select the Grey Cog Notepad**
3. From the pop-up window select the **Import from File** button.
4. Select the Third-party devices folder and select an appropriate command set for your device.

Controlling an IR or RS232 device via a Centro Gateway

If your 3rd-party device is controlled via IR or RS232, then a Centro-XX gateway will be required. To link commands to an output of a Centro gateway perform the following.

1. Navigate to **Project Settings > New Centro-xx >**
2. Select the Centro device from the Project Navigation menu then navigate to **Pre-defined Commands > Select the Grey Cog Notepad**
3. In the **Device Commands** section select the appropriate output of the Centro gateway that will be used to control the 3rd-party device (e.g. IR Port 1).
4. Select the **Import from File button > Select Third-party device folder > Select a command set file**
5. Repeat the above steps for any other 3rd-party devices being controlled through a Centro gateway
