JUKE AUDIO

Multi-Room Audio Made Simple

6 & 8 zone digital streaming amplifier for architectural audio

ABOUT JUKE AUDIO

Juke Audio's multi-zone streaming amplifier is a revolutionary all-in-one product used for powering and wirelessly controlling pre-wired speakers across an entire home or building.

At the size of a textbook, the unit can drive up to 16 speakers across 8 zones, supports up to 4 inputs simultaneously, and contains modern streaming technology for easy listening from phones/tablets across any combination of rooms over Wi-Fi.

Juke is a break-through in simplicity, reliability, and cost-effectiveness.
