

# 120/240W 6-Channel Commercial Amplifiers

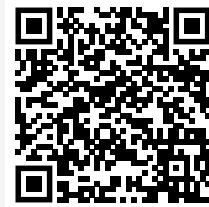

## PA6X Product Manual

### ⚠ Safety Instructions

For optimum performance and safety, please read these instructions carefully before use and keep this guide for future reference. Please have the part number, serial number, and invoice available when requesting support.

- To prevent an electrical shock, please ensure all devices are properly grounded.
- Place the device in a well-ventilated area and do not block any ventilation openings.
- Do not expose or place device near water - liquid may cause a failure, fire, or electrical shock.
- Do not place the device on an uneven or unstable surface - a fall may result in a malfunction.
- Never insert anything metallic into the device - this may cause an electrical shock.
- If a third-party power supply is used, please ensure it meets the requirements of this device.

## Description

The PA6X series of 6-channel commercial amplifiers are designed for versatile audio distribution in retail, hospitality, and office environments. Supporting both 8ohm and 70/100V speaker systems, it offers flexible installation options to suit a wide range of projects. With inputs for two microphones, multiple line sources, Bluetooth connectivity, USB flash drives, SD/MMC memory cards, and a FM radio tuner, it delivers convenient playback and seamless mixing capabilities. Available with 120W or 240W total power output, these amplifiers provide reliable performance and a clear, balanced sound for any commercial setting.

### Key features:

- Compatible with 4/8/16ohm and 70/100V speaker systems
- 120/240W total power or 20/40W per channel
- Multi-zone control to independently manage audio in 6 zones
- Front panel dials control for all functions
- Rack mounting ears and hardware included

### Box contents:

- (1) PA6X120/240 amplifier
- (1) Set of rack mounting ears and hardware
- (1) FM tuner antenna
- (1) Remote control
- (1) Quick start guide

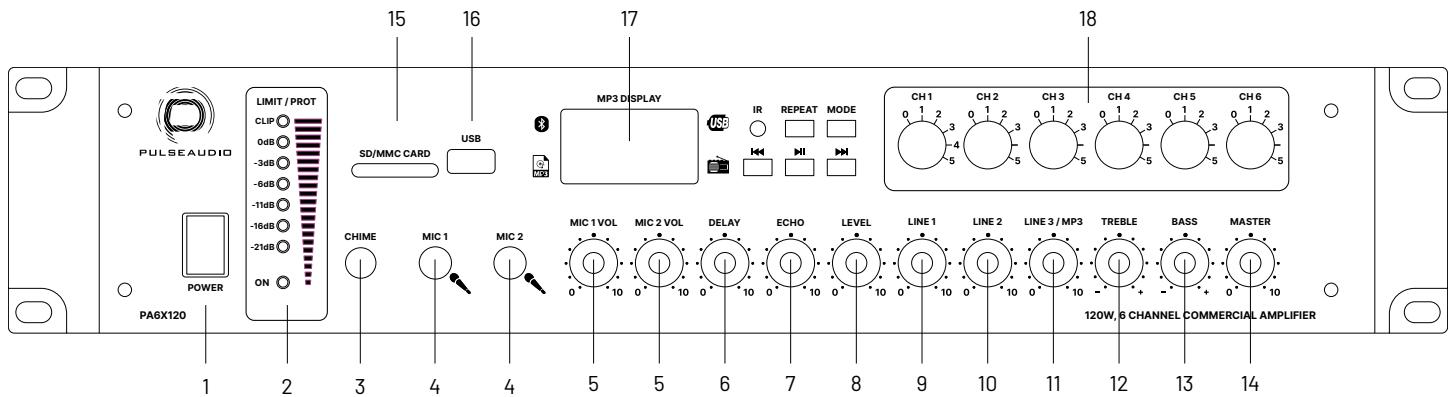

### [PA6X120 120W, 6-Channel Commercial Amplifier](#)

120W of total power or 20W per channel

### [PA6X240 240W, 6-Channel Commercial Amplifier](#)

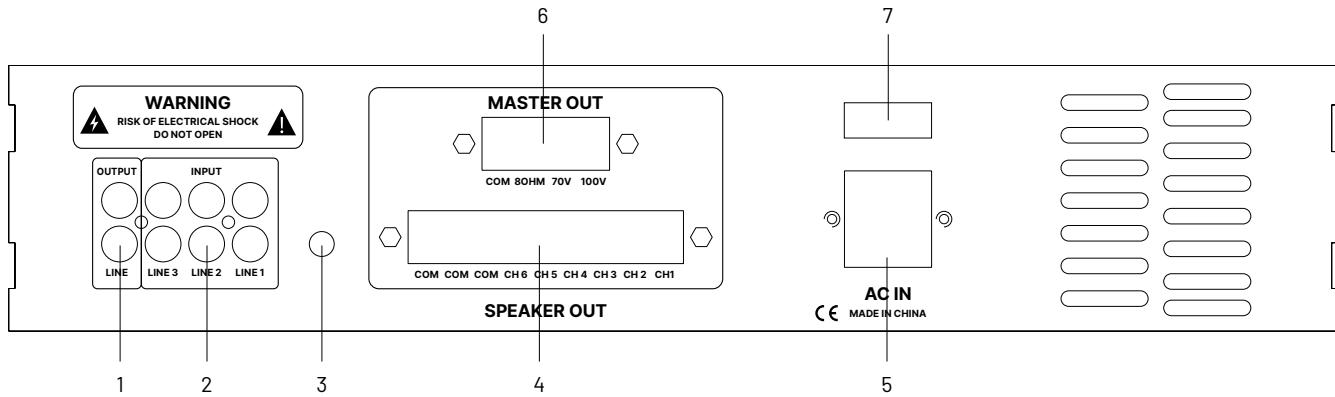

240W of total power or 40W per channel

## Panel Descriptions

### Front Panel

|    |                           |  |
|----|---------------------------|--|
| 1  | Power Switch              | Turns device on/off  |
| 2  | Level Display             | Shows level of the Master Output                           |
|    | Limit / Prot              | Senses clipping for protection based on Limit dial setting |
| 3  | Chime                     | Press to activate bell/chime from Master Output            |
| 4  | Mic Inputs                | 1/4" microphone inputs                                     |
| 5  | Mic Volume Control        | Controls level of microphone output                        |
| 6  | Echo Delay Control        | Adjusts time delay for echo                                |
| 7  | Echo Repeat               | Control repeat time of echo effect                         |
| 8  | Echo Level Control        | Control the depth of the echo effect                       |
| 9  | Line 1 Volume Control     | Adjusts volume for Line 1 Input                            |
| 10 | Line 2 Volume Control     | Adjusts volume for Line 2 input                            |
| 11 | Line 3/MP3 Volume Control | Adjusts volume for Line 3 input                            |
| 12 | Treble                    | Adjusts the "high" tones of the audio output               |
| 13 | Bass                      | Adjusts the "low" tones of the audio output                |
| 14 | Master                    | Overall volume control                                     |
| 15 | SD/MMC Card Slot          | Insert formatted SD card with content                      |
| 16 | USB Port                  | For connecting to USB flash drive with content             |
| 17 | MP3 Display               | Shows digital information of source being played           |
| 18 | Speaker Output Control    | Adjusts 6-independent volume control levels                |

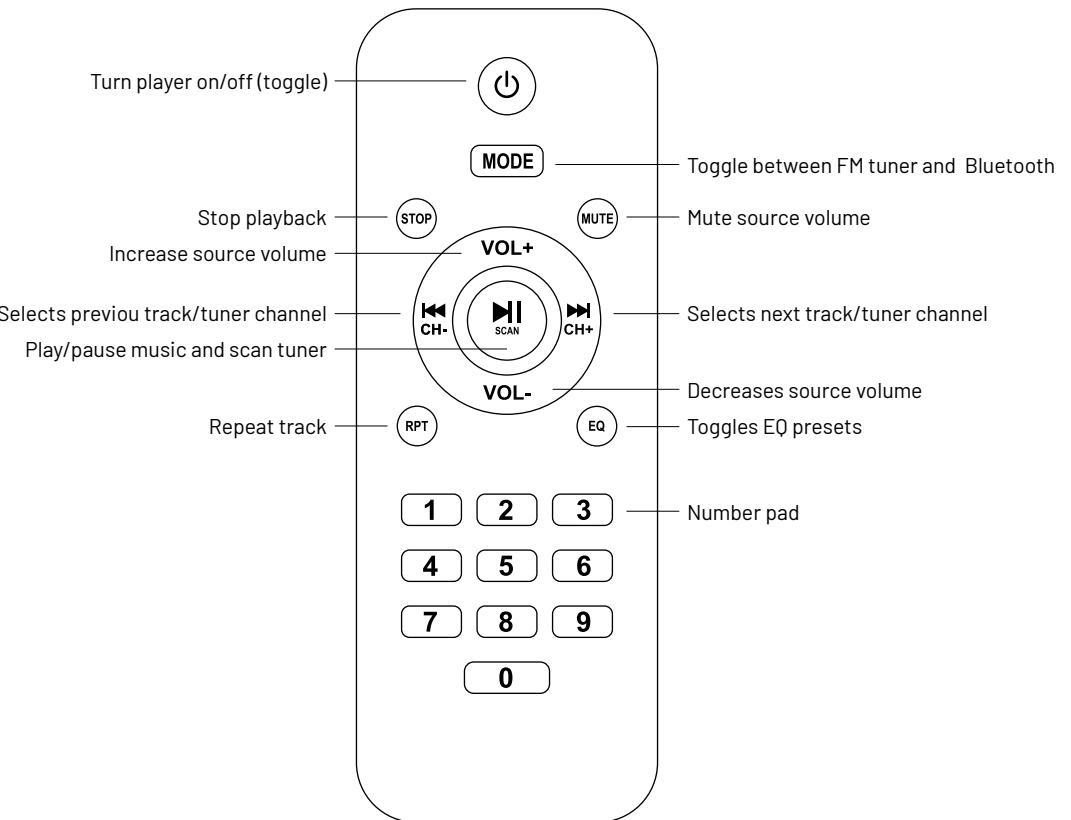

### Rear Panel

|   |                |  |
|---|----------------|--|
| 1 | Line Outputs   | Dual mono line level RCA outputs             |
| 2 | Line Inputs    | 3 independent line level RCA stereo inputs   |
| 3 | Antenna Port   | Use with provided antenna for FM tuner       |
| 4 | Speaker Output | Connects to 70/100V speakers                 |
| 5 | AC Connection  | 110V or 220V AC power connection             |
| 6 | Master Output  | Connects between 4-16 ohm stable speakers    |
| 7 | Voltage Switch | Switch to be compatibility with 110V or 220V |

### Remote Control Description and Use

The provided remote is used to control internal or streamed sources such as Bluetooth, USB flash drive, SD Card, or FM tuner.

## Specifications

Vanco International LLC reserves the right to change the specifications, features, and/or appearance of this product at any time without notice. Visit [www.vanco1.com](http://www.vanco1.com) for the lastest versions of the manual and other resources.

| Technical   |  |                        |
|---|--|------------------------|
| RMS Output Power                                  | 120/240W   |                        |
| Master Speaker Impedance                          | 4-16ohm  |                        |
| Input Sensitivity - Microphone                    | -50dB / 600  |                        |
| Input Sensitivity - Line                          | -10dB / 10k  |                        |
| Frequency Response                                | 60Hz - 18kHz   |                        |
| Total Harmonic Distortion (THD)                   | 0.1%   |                        |
| Signal-to-Noise Ratio                             | Mic: 66dB  | Line: 102dB            |
| Zone Quantity                                     | 6  |                        |
| Amplifier Type                                    | Class AB   |                        |
| Inputs  | Stereo RCA, USB, Bluetooth 5.0, SD Card, 1/4" Mic, FM Tuner  |                        |
| Outputs   | Dual RCA mono outputs  |                        |
|   | 4/8/16 ohm and 70V/100V screw down speaker terminal (Master) |                        |
|   | 6x 70/100V screw down speaker terminal                       |                        |
| Dimensions (W x D x H) - with rack ears           | 19in x 14.75in x 3.5in (480mm x 375mm x 88mm)                |                        |
| Dimensions (W x D x H) - with feet (no rack ears) | 17in x 14.75in x 3.9in (432mm x 375mm x 99mm)                |                        |
| Weight  | PA6X120: 18lbs (8.2kg)                                       | PA6X240: 21lbs (9.5kg) |
| Power Supply                                      | AC 100-120V or 220-240V                                      |                        |

## Connect & Operate

Please reference the diagrams below for how to connect and operate the PA6X series of amplifiers.

### Connection Diagram

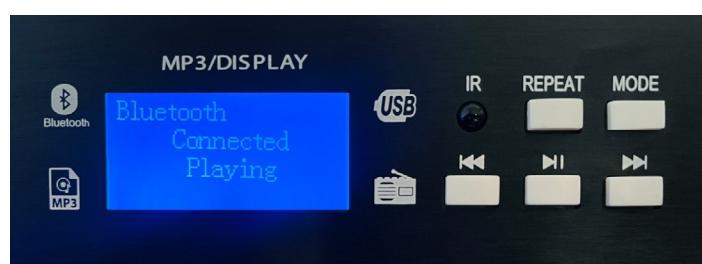

1. Ensure power is off or removed from the PA6X series amplifier.
2. Connect any line in analog audio sources using the stereo dual-RCA input, USB flash drive, or SD or MMC memory card.
3. If using microphone(s), connect using the 1/4" connections on the front of the unit.
4. If using the built-in FM tuner, connect the provided antenna to the antenna port and extend and adjust for best results.
5. Connect the speakers accordingly:
  - COM acts as the NEGATIVE terminals and can be shared among others
  - CH1-CH6 acts as the POSITIVE terminals and are independent

**NOTE:** Master Output has 4-16 ohm capabilities and 70V/100V capabilities. Use the COM terminal as the NEGATIVE and either 70V, 100V, or 8 ohm as the POSITIVE terminal

6. Connect the power into the power input port.
7. Power on attached audio devices and test.

### Pairing Bluetooth

1. On the front panel of the amplifier, or by using the provided remote control, press the Mode button until Bluetooth is shown on the front panel LED.
2. On your Bluetooth enabled device, search through nearby Bluetooth devices and find and select PA-BT.
3. Play content. The status of the Bluetooth connection and action will be displayed on the front panel LED screen.
