

## One - The smart speaker for room filling sound

Sonos One blends great sound with Amazon Alexa, the easy-to-use voice service, for hands-free control of your music and more. Use your voice to play songs while you cook. Tell Alexa to turn the volume up while you're in the shower. You can even request a lullaby, out loud, when you're tucking in the kids.

- **Play and control your music, hands-free. Just ask.**
- **Music and much more** - Ask Alexa to check news and traffic, set a timer, manage smart devices and other helpful skills using a single Sonos speaker. \*Sonos One does not support Alexa voice calling.
- **Multi room listening** - Sonos One wirelessly connects to Sonos speakers in additional rooms, allowing you to expand your Home Sound System when you're ready.
- **Superior Sound** - Built on the mini-but-mighty blueprints of Play:1, Sonos One is backed by a pair of Class-D amplifiers and custom-built drivers, meticulously tuned to the speaker's unique acoustic architecture.

### Tech Specs

2x Class-D digital amplifiers 1x tweeter
