

Technical Specifications

Fiber Enclosure – 24 Port Rack Tray

Features at a Glance

- 24 total customizable ports
- Adapters and couplers sold separately
- Supports up to 48 strands of fiber (24 duplex adapters/couplers)
- Built-in fiber cable coiler for strain-relief
- Built-in tension lugs
- Steel construction
- Indoor rated
- 1RU design
- Compatible with both single mode and multimode cable and adapters/couplers

The 24-port rack tray is a simple, cost-effective solution for terminating, adapting, and coupling fiber optic cables in an equipment rack. Its steel construction provides strength and durability, and its modular design accommodates up to 24 standard couplers or adapters for 48 total strands of fiber.

The tray mounts in a standard 1RU space and features top and end panels for a secure, enclosed installation.
