

OPEN YOUR EYES TO THE BRIGHT SIDE OF SIGNAGE™

BrightSign is the Global Market Leader in Digital Signage Media Players

BrightSign has been the global market leader from 2011-present, as shown in quarterly IHS market research reports. BrightSign has shipped over 1 million players!

PC-Class Performance And Reliability – without the PC hassles

- Robust and dependable solid-state platform delivers the highest standard of reliability (<0.2% failure rate) and longevity (5 years + operating life).
- Designed exclusively for digital signage, BrightSign's slim OS delivers exceptional 4K and Full HD video quality and superior performance that far exceeds anything that PC systems can provide.
- BrightSign offers multiple networking solutions including integration into all types of backend systems.

Powerful Video and HTML5 Rendering Engines

- Dual decoding and superior scaling to deliver pristine 4K and 1080p video content — even Live TV.
- Flawless, simultaneous playback of video layered with multiple modular assets powered by a hardware-accelerated Chromium HTML5 rendering engine.

Easy To Use, Sophisticated Features Including True 4K Playback

Get dynamic results without difficulty with BrightSign's abundance of sophisticated and easy-to-use features.
