

# WIREMOLD®

## Flush Style Poke-Thru Devices

### Bring Power & Communication Services Directly to the Workstation

Protection from  
water, dirt,  
and debris.

Flush Style Poke-Thru Devices are an excellent solution for bringing power, communication, and audio/video services to the workstation in an open space, above-grade floor environment. All Wiremold Flush Style Poke-Thru Devices come with built-in TopGuard™ protection, an industry-leading design that meets and exceeds UL scrub water exclusion requirements for tile and carpet floors. Topguard protection prevents water, dirt, or debris from entering not just the power devices, but also the communication devices.

All Wiremold Flush Style Poke-Thru Devices can be installed on tile, carpet, or wood covered floors. Each of these devices provides an excellent solution for both new or retrofit construction, with typical applications that include office buildings, airports, malls, shopping centers, libraries, and schools.

RC7 Series

AV3 Series

RC4 Series

AMD8 Series

### FEATURES & BENEFITS

- **AV3 Series is specifically designed to meet the growing needs of the audio and video market.** AV3 Series accepts Extron® MAAP Series mini architectural adapter plates. The MAAP line includes passive A/V connector plates that support a wide variety of video, audio, control, voice and data connectors, as well as active modules such as VGA line drivers, audio buffers and twisted pair transmitters. (Extron devices sold separately only through authorized Extron dealers.)
- **AMD8 Series is designed to meet the growing need for more communication capacity at the workstation.** AMD8 Series is a large capacity all communication poke-thru device, providing up to 8-ports for communication devices. AMD8 is a flush style device with individual slide covers to prevent water, dirt and debris from entering the communication devices.
- **TopGuard Protection.** Integral design component that prevents water, dirt and debris from entering power and communication compartments. Whenever you see the TopGuard protection icon on any Wiremold product, you'll know it meets and exceeds UL scrub water exclusion requirements for tile and carpet floors.
- **UL Listed and UL Fire Classified to U.S. and Canadian safety standards for tile and terrazzo.** Includes the new UL requirements under UL514A and UL 514C for the scrub water exclusion test for carpet and wood covered floors.
- **Multiple service capability.** RC7, AV3, and RC4 Series provide power and communication services. The AV3 and RC4 Series provide for use of flush or recessed fiber optic devices. Eliminates the cost of a second poke-thru to accommodate additional services.
- **Provides flexibility with a single poke-thru unit.** 20A duplex receptacle in the AV3, and the RC7 Series can be wired as standard or isolated ground receptacle. Two 20A duplex power receptacles in the RC4 Series are wired with a 6-wire system with individual neutral and ground wires, and can be wired for standard or isolated ground. RC9 quad 15A receptacle can also be wired as standard or isolated ground receptacle.
- **Individual slide covers.** Protects power and communication devices. Power slide covers snap back into place when receptacle is not in use. Activate either power or communication services, simultaneously or individually. RC9AMD and AMD8 Series Poke-Thru Devices are the only all communication poke-thru devices available with slide cover protection.
- **Datacom connectivity options.** Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point-of-use.
- **“Step-on-it” installation.** Quick and easy installation without the need for additional fasteners or a second installer.
- **Suitable for use in air handling plenums.** In accordance with Sec 300-22(C) of the National Electrical Code.
- **Meets ADA Accessibility Guidelines.** Wide trim flange on the product is designed to meet the ADA Accessibility Guidelines as it pertains to ADA Standard 4.5 which addresses changes in floor and ground surface levels. The poke-thru trim flanges are beveled so the slope is no greater than 1:2 ratio.
- **Fire rated for up to 2-hour rated floors.** Maintains the fire classification of the floor.

\* The above maximum copper fill values are the maximum amount of copper to maintain fire classification and are for each individual power and communication compartments. Do not add values together for any one compartment.

# Flush Poke-Thru Device Specifications

## Copper Cross Section:

The copper cross-sectional area determines the amount of wire fill capacity in a poke-thru device. Unlike other wire and cable management systems that utilize wire fill capacity, a poke-thru device is UL tested under fire conditions to determine the maximum amount of copper conductors that will pass through a poke-thru device, while maintaining the fire-rating of the floor assembly. All Walker Flush Style Devices are UL Classified to U.S. and Canadian safety standards.

Copper Cross Sectional Area of Commonly Used Conductors		
Size	Solid	
#24	.00032 sq. in.	(.206mm <sup>2</sup> )
#23	.00040 sq. in.	(.258mm <sup>2</sup> )
#22	.00050 sq. in.	(.322mm <sup>2</sup> )
#14	.00323 sq. in.	(2.083mm <sup>2</sup> )
#12	.00512 sq. in.	(3.303mm <sup>2</sup> )
#10	.00815 sq. in.	(5.258mm <sup>2</sup> )
# 8	.01296 sq. in.	(8.361mm <sup>2</sup> )

**NOTE:** Use above values for solid or stranded conductors.

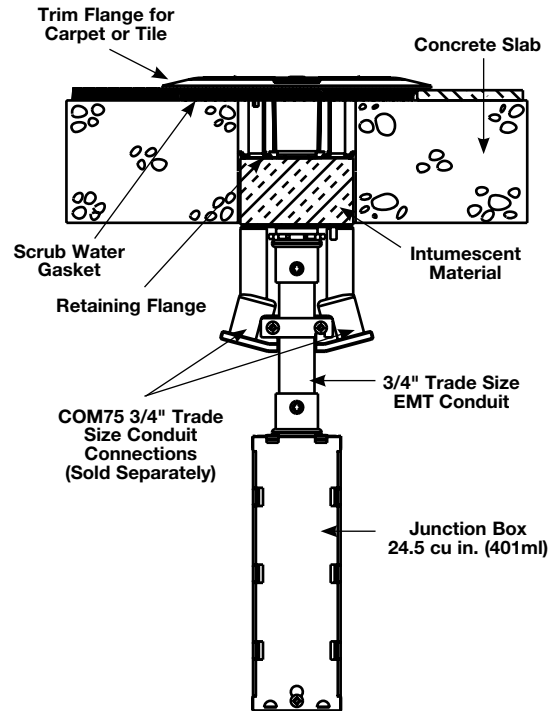

## Concrete Thickness Min/Max:

**1-HOUR RATED FLOOR** – 2 1/4" (57mm) min over top of deck (or 3" (76mm) thick reinforced concrete slab) to a maximum of 7 1/2" (191mm).

**2-HOUR RATED FLOOR** – 3 1/4" (83mm) min over top of deck (or 4" (102mm) thick reinforced concrete slab) to a maximum of 7 1/2" (191mm).

## Floor Coverings:

The poke-thru device is fire rated for carpet and wood covered concrete floors, and tile floor coverings 1/8" to 3/4" (3.2mm to 19.1mm) thickness. For floor coverings not listed above, consult factory.

**CAUTION:** These devices are suitable for 1, 1 1/2, and 2 hour rated floor assemblies as described in the UL Fire Resistance directory for each service. These devices meet all UL scrub water requirements, but are not suitable for wet or damp locations, or other areas subject to saturation with water or other liquids such as commercial kitchens.

Download this product's PEP ecopassport<sup>®</sup> environmental product declaration at [www.legrand.us/resources-and-downloads](http://www.legrand.us/resources-and-downloads). This declaration conforms with ISO 14025 and 14040 and is in alignment with EN 15804.

Poke-Thru Devices and abandonment fitting are for use with 1-, 1 1/2-, or 2-hour rated unprotected reinforced concrete floor and 1-, 1 1/2- or 2-hour rated floors employing unprotected steel floor units and concrete topping (D900-Series Designs), or concrete floors with suspended ceilings. (Fire resistive designs with suspended ceilings should have provisions for accessibility in the ceiling area below the Poke-Thru Fittings).

The assembled Poke-Thru stem and service fitting or the abandonment fittings will not reduce the ratings of the floor assembly when the thickness and type of concrete (required for the specific rating) are within the specified limits and the fittings are installed as specified:

- 1. Spacing** – Minimum of 2' (610mm) OC and not more than one unit per 65 square feet (6 square meters) of floor area in each span.
- 2. Concrete** – Minimum thickness of structural concrete topping of 2 1/4" (57mm) over metal deck or a minimum 3" thick reinforced concrete slab. Unit weight of concrete to be 110 to 155 pcf.
- 3. Installation** – Mounted in a 4" (102mm) diameter core drilled hole in concrete per installation instructions accompanying the fittings or abandonment fittings. For use with power circuits, data and/or telephone cables as tabulated below.

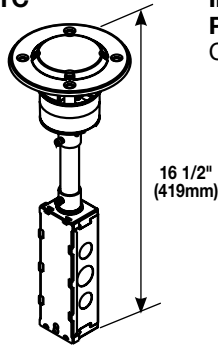

**NOTE:** The material that is used in Wiremold<sup>®</sup> Poke-Thru devices is not listed under the directory for Fire Stopping Material because the poke-thru device is UL Classified as "Outlet Boxes and Fittings Classified For Fire Resistance (CEYY)". The pass/fail criteria comes from UL263. The pass criteria is that the poke-thru unit cannot exceed 325° F. above ambient before the concrete slab (or deck) reaches this same temperature. Some poke-thru devices are tested for 2 hours while others are tested for 4 hours. The intumescent material has never been tested as a fire-stopping material as a stand-alone device. This material is designed to work as a unit with the entire poke-thru device.

## RC7 Series Ordering Information

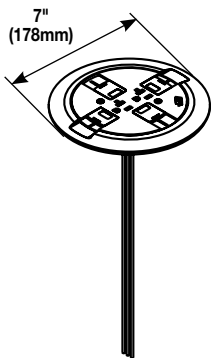

**Catalog No./Item**      **Description/Specifications**

**RC7STC**

**Insert Assembly with Disposable Plate** – Use with RC7C Series Covers to complete installation.

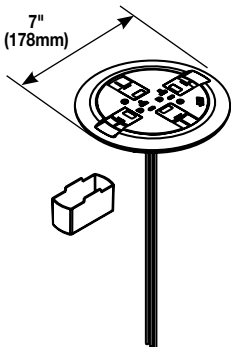

**RC7CTCGY\***  
**RC7CTCBK\***  
**RC7CTCAL\***  
**RC7CTCBS\***  
**RC7CTCVY\***  
**RC7CTCAB\***  
**RC7CTCAA\***

**Finish Flange and Slide Holder Assembly** – Prewired 20A duplex can be wired as standard duplex or isolated ground. Wiremold Open system unloaded inserts to accept two discrete keystone connectors from most manufacturers are provided. Includes 2 Cat 6 TechChoice™ discrete keystone connectors and Ortronics® TracJack adapters.

**CAUTION: Not intended for use on polished concrete or terrazzo floor applications.**

**RC7KTCGY\***  
**RC7KTCBK\***  
**RC7KTCAL\***  
**RC7KTCBS\***

**Retrofit Kit** – Used to upgrade existing installations of RC7 Poke-Thru Devices on carpet floors to meet scrub water requirements. Includes 20A duplex receptacle that can be wired as a standard duplex or isolated ground, two Category 6 TechChoice™ discrete keystone connectors, and two Ortronics TracJack mounting bezels. Also includes scrub water finish flange and slide holder assembly. Kit also includes duplex receptacle barrier. Old barrier must be replaced with new. See installation instructions with retrofit kit for complete installation details.

**AV3ATCBS\***  
**AV3ATCAB\***  
**AV3ATCVY\***

**Assembled Unit** – A/V device includes one prewired 20A duplex receptacle which can be wired as a standard receptacle or isolated ground. Includes one Extron bezel to accept Extron MAAP mini architectural adapter plates. (Extron devices sold separately, only through authorized Extron dealers). Includes Ortronics® TracJack and Series II mounting adapters and Wiremold Open System adapters and inserts.

**NOTE:** Assembled with scrub water gasket. For use on tile or carpet floors.

**NOTE:** Modular Jacks sold separately.

**CAUTION:** Not intended for use on polished concrete or terrazzo floor applications.

**Catalog No./Item      Description/Specifications**

**AV3SHTCBKCR**  
**AV3SHTCBSCR**  
**AV3SHTCGYCR**  
**AV3SHTCALCR**  
**AV3SHTCVYCR**

**Poke-Thru Controlled Receptacle** – Nonmetallic Slide Holder Assembly with Controlled Receptacle Markings. Markings are located in a recess pad and are permanent indicating the duplex receptacle below has been wired up to comply with 2014 NEC®, CA Title 24 and ASHRAE Energy Efficiency Standard 90.1. Available in black (BK), brass (BS), gray (GY), aluminum (AL) and ivory (VY). Slide holder to be used with the AV3ATC and AV3CTC units.

**AV3SHTCGY**  
**AV3SHTCBK**  
**AV3SHTCAL**  
**AV3SHTCBS**  
**AV3SHTCVY**

**Nonmetallic Slide Holder Assembly** – Available in gray (GY), black (BK), ivory (VY), aluminum colored (AL), brass colored (BS).

**NOTE:** Assembled with scrub water gasket. For use on tile or carpet floors.

**AV3APTCGY**  
**AV3APTCBK**

**Abandonment plate** – Abandonment available in black (BK) and gray (GY).

**RC37REC**  
**RC37REC-25**

**Replacement Receptacle** – Prewired snap-in 20A receptacle can be wired as standard duplex or isolated ground. Available only in black. See installation instructions with replacement receptacle for complete installation details. The RC37REC-25 is available with 25 foot leads and can be wired as standard duplex or isolated ground.

**NOTE:** The 20A duplex receptacle supplied with the scrub water version AV3 Poke-Thru Device is proprietary and can only be replaced with the RC37REC or RC37REC-25.

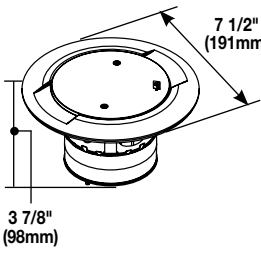

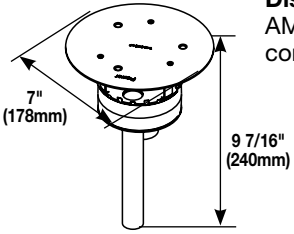

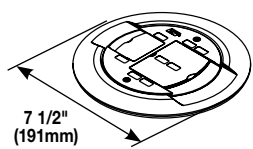

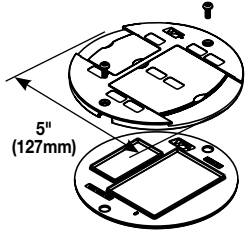

\* Poke-Thru Devices on this page are available in some or all of the following cover color options as indicated by the part numbers:  
 GY – Gray painted flange with gray nonmetallic cover,  
 BK – Black painted flange with black nonmetallic cover,  
 VY – Ivory painted flange with ivory nonmetallic cover,  
 AL – Brushed Aluminum flange with black nonmetallic cover  
 BS – Brushed Brass flange with black nonmetallic cover  
 AA – Brushed Aluminum flange with aluminum-colored nonmetallic cover  
 AB – Brushed Brass flange with brass-colored nonmetallic cover  
 Where applicable, slide covers match the cover color.

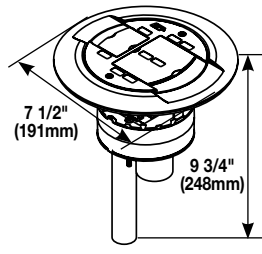

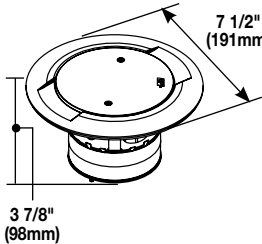

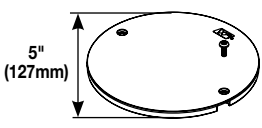

**NOTE:** See page 3 for specifications.
