

Singing in the Rain

Come rain or shine, the all-new Proficient AW830 is a breath of fresh air among all-weather loudspeakers. With its massive 8" long-throw woofer, 3" midrange, 1" pivoting tweeter and classic Proficient design, the AW830 delivers sound as big as the all outdoors.

How big? Well , while most all-weather speakers boast a 5" or 6" driver, the AW830 combines its huge 8" design and a premium, ported enclosure to outperform virtually every contender out there. And it does so at a price that's around the same as most of its competition.

Add to all this Proficient's legendary reliability and 10-Year Limited Warranty and you have an all-weather speaker that will never rain on your parade.

So, if you're ready for the biggest performance your backyard has ever experienced, choose the all-weather speaker that will give it to you rain or shine 365 days a year.

The AW830 is quality built, of course. Just what you'd expect from Proficient.
