Handcrafted in America

Handcrafted in America

History built from lasting quality

Hanover Lantern began in 1970 in a small town east of historic Gettysburg, Pennsylvania, and is still handcrafting its products there today. Times have changed, but Hanover's old world manufacturing practices and values remain the same.

Hanover Lantern is a leading American manufacturer of made-to-order cast aluminum outdoor lighting products and matching accessories shown on the pages of this catalog.

First Impressions

Unlimited styles, sizes and finishes for any home.

Hanover Lantern offers a comprehensive selection of classic lantern styles to enhance any architectural theme.

A series of several sizes are available on each design style to add that finishing touch to your application.

Complementing styles, sizes and finishes are unlimited.

Finishing Touches with Lasting Quality

Wall Lighting

With numerous designs to choose from, Hanover Lantern has a style to complement any architecture. Each series has multiple sizes and mounting options, so you can find the appropriate fixture for your application. With 20 finishes, we can beautifully integrate your fixtures with your exterior color scheme.

Post Lighting

Hanover Lantern offers numerous post top lighting designs to complement your wall lighting and pier lighting. Whether you use a single post outside your front entrance, or multiple posts to line your driveway, our lighting will provide security and beauty to your property.

Pier Lighting

Create a dramatic entrance to your property with the use of our pier mounted fixtures. Hanover Lantern manufactures a wide range of models and sizes for any application.

Landscape Lighting

Enhance the beauty of your property after dark with Hanover Lantern's landscape lighting. Welcome your guests by painting your walks, steps and garden pathways with the radiant shimmer of our Terralight landscape fixtures. Create a focal point by uplighting an ornamental tree or washing a wall with the soft glow from a low voltage spotlight.

Mailboxes and Signs

Add a totally integrated look to your property with the addition of a sign or mailbox. Hanover Lantern offers many standard cast aluminum signs in a variety of shapes and sizes. Our upscale mailboxes, available in your choice of any of our elegant, hand-applied finishes, are manufactured in a variety of configurations and sizes.

Posts

Hanover Lantern offers an expansive line of post and designer base wraps to complement all our lighting fixtures. Whether you want to install a direct burial or anchor base post, we have an option for your property.

Fixture Sizing

Select the best fixture size for your application

A property's entrance sets the style and tone of its owners. Choosing a fixture that is properly proportioned to its surroundings is critical. The following series of photographs is used to illustrate this point. Your local lighting showroom can offer expertise in helping you select the correct fixture for your application.

Jamestown Series – POST MOUNT

B2330

B9330

B9430

B30860

Most home centers offer only smaller sized outdoor lighting fixtures. The photographs above clearly illustrate the need for larger scale lighting fixtures. A small size lantern is not recommended for use on a 6' residential post. A 20" high or larger fixture will be a perfect fit based on proportions.

Manor Series – PIER MOUNT

B2531 (400 pier base mount)

B4131 (400 pier base mount)

B5531 (400 pier base mount)

B6160

Manor series is just one of many styles offered by Hanover Lantern in four different sizes. Shown above in a pier mount configuration on a 30" square pier, size and scale of the fixture to its environment is critical. If you have doubts or questions, your local lighting showroom can help determine size.

South Bend Series – WALL MOUNT

B512FRM

B514FRM

B516FRM

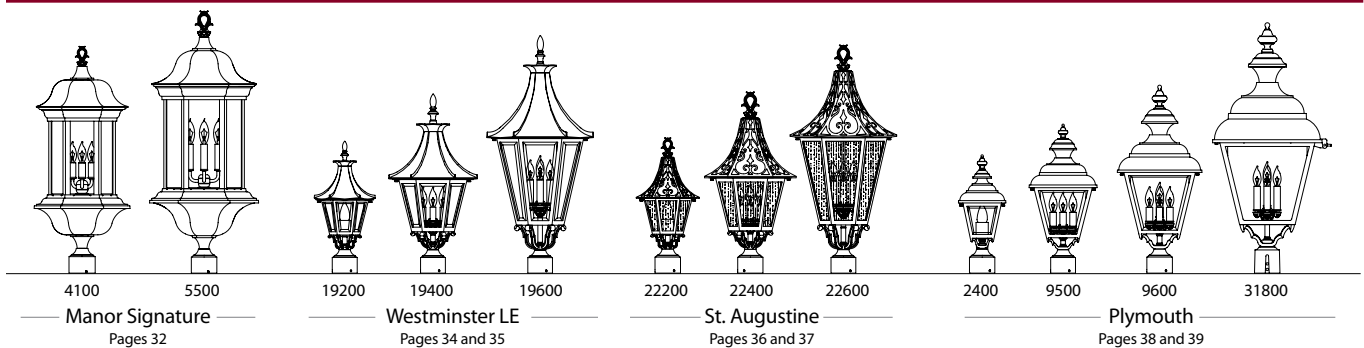

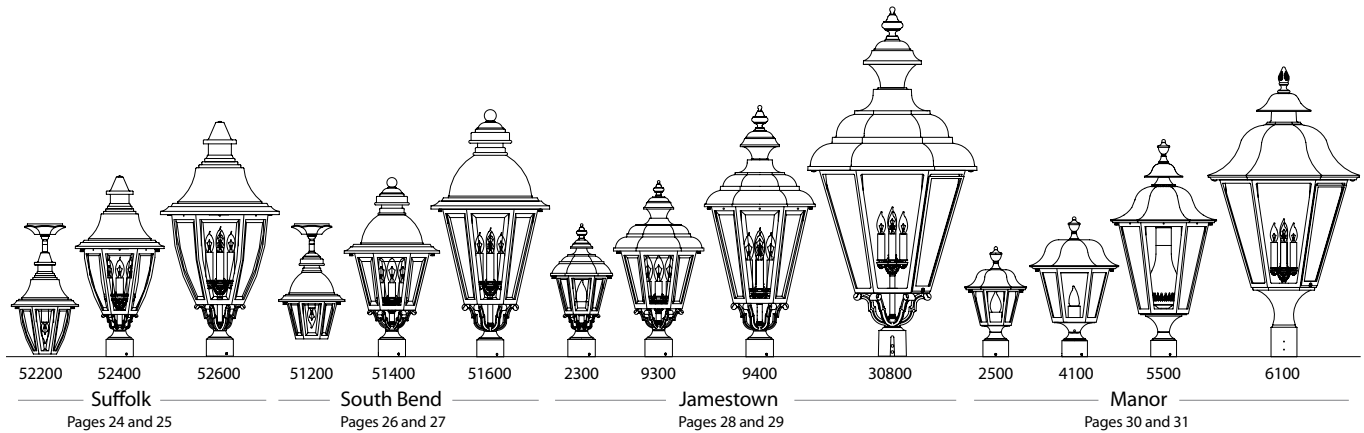

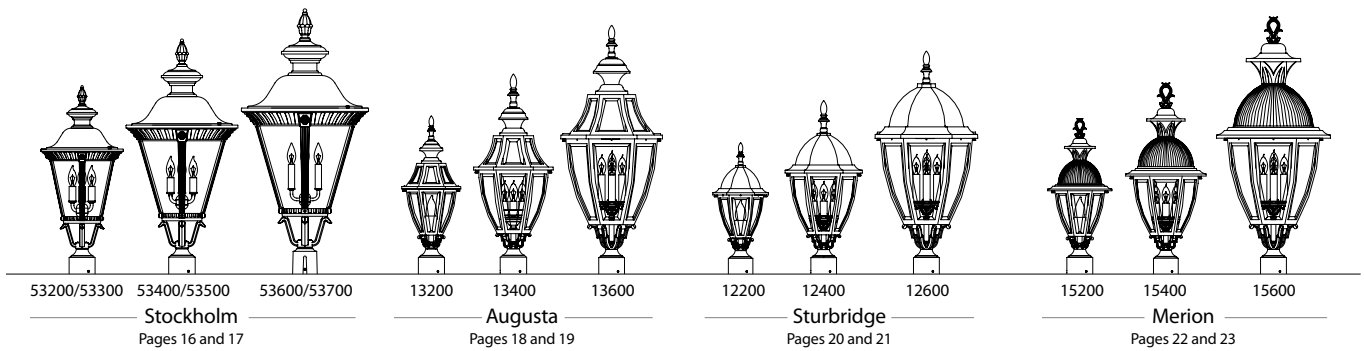

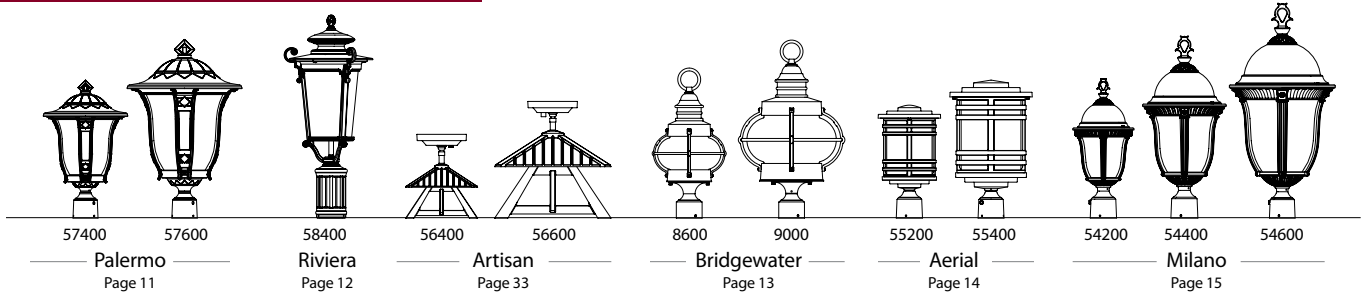

B516FSM

Consumers often make the mistake of selecting outdoor lighting fixtures that are too small. The photos above show different size fixtures of the same design in the identical installation. Remember to keep the location of the electrical box in mind for proper height. By looking at these fixtures at a distance, you can tell which is best for your home.

Helpful sizing for an outdoor lantern

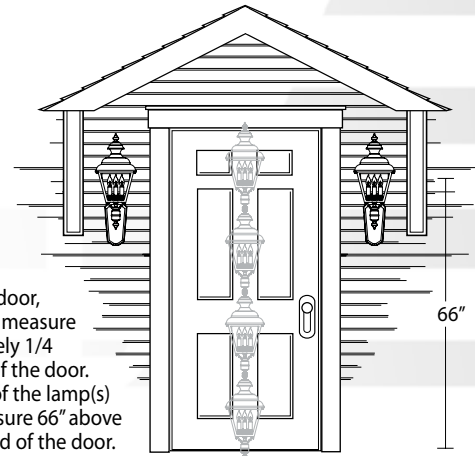

Selecting the correct size lantern can sometimes pose a challenge. Use the following guidelines to help determine what's best for your application.

The height of an outdoor lantern should be based on the height of the door.

When only one lantern is used at the door, it should measure approximately 1/3 the height of the door. The center of the lamp(s) should measure 66" above the threshold of the door.

When two lanterns are used at the door, they should measure approximately 1/4 the height of the door. The center of the lamp(s) should measure 66" above the threshold of the door.
