

Flexible Smart Home Devices

Shelly is coming to the PowerHouse Alliance. Join us for an introduction to Shelly's smart plugs, sensors, relays, lighting, controllers and energy meters, built to work with the control platforms you already use and sell, including Control4, Crestron, URC, RTI, ELAN and Josh.ai. Shelly devices run locally with no cloud or subscription required, which makes them a practical fit for the projects you're already quoting. We'll also give you a first look at new products arriving over the next one to two months.

WHAT YOU'LL TAKE AWAY

- The Shelly lineup at a glance: plugs, sensors, relays, lighting, controllers and energy meters, and where each fits in a project
- How Shelly works with the control platforms you sell: Control4, Crestron, URC, RTI, ELAN and Josh.ai, plus Alexa, Google Home, Apple Home and Home Assistant
- Why dealers choose Shelly: local control with no cloud or subscription required, support for Wi-Fi, Bluetooth, Zigbee, Z-Wave and Matter, and scripting for custom logic
- A first look at what's coming: Shelly Camera, HiLux downlights, Neo Water Valve and Power Strip 4
- How to order Shelly through your local PowerHouse Alliance distributor
