VEHICLE DETECTION

FACIAL RECOGNITION: With Facial Recognition an alarm can be triggered if a face is detected in a designated area. Alarms can also be triggered on specific faces, or recognized vs. unrecognized faces. Facial Recognition **Captures, Recognizes,** and **Stores** faces and you can search by face during playback. Send real time alerts when there is a friendly or unfriendly face in view. It's a self-contained system (camera & recorder) with no licenses or monthly fees.

LINE CROSS COUNTING: Line Crossing has the ability to maintain counts of people and/or vehicles. Alarms can also be triggered on excessive counts to control crowd density, which is an important feature. Line Crossing alerts you when someone enters an area they are not supposed to be in.

PEOPLE DETECTION: Virtually eliminates false motion alarms! Speco's analytic cameras and recorders with people detection can notify you of people in the scene and ignore everything else such as animals and precipitation. Alarms can be triggered if people enter view or a pre-defined region. Alarms can also be tailored to trigger upon entrance or exit of region.

LICENSE PLATE RECOGNITION: Taking Vehicle Detection to the next level with the addition of License Plate Recognition. **Capture** and **Search** by license plate or by date and time.

VEHICLE DETECTION: Trigger motion that matters! Speco's analytic cameras and recorders with Vehicle Detection will detect vehicles, motorcycles, and even bicycles. Alarms can be triggered if vehicles enter entire view or a pre-defined region. Alarm can also be tailored to trigger upon entrance or upon exit of a region.

VIDEO BLURRING/SCENE CHANGE (TAMPERING DETECTION): Be alerted when your surveillance camera is moved, loses focus or is physically altered.

Speco's Intelligent Solutions provide you with answers for today's problems.

5 Port Gigabit Network Switch
(4 Ports PoE, 1 Port Uplink)

• Port 1 supports up to 40W and all ports
  support 802.3at/802.3af.
• Ports 3 and 4 can be extended up to 800' (250M)
  @10mbps
• VLAN Mode: When the VLAN mode is selected, each
  PoE port is isolated and independently connects with
  cameras, computers or other switches, while the uplink
  port connects with a router.
• The VLAN function helps avoid broadcast storms
  and ARP spoofing.

P4S6G

6-Port Gigabit Network Switch
(4 ports PoE, 2 ports uplink)

• Gigabit performance on all ports
  (uplink and downlink)
• PoE watchdog mode: PoE will continuously monitor for
  lost device connections and reset the port when detected
• Port 1 supports 802.3bt 60W and all ports
  support 802.3at/802.3af
• All ports can be extended up to 800' (250M)
  @ 10MBPs using high quality CAT6 cable

P32S36GM

36 Port Gigabit Managed Network Switch

(34 Ports PoE, 4xSFP Uplink)

• Layer-2 managed switch (supporting PoE function)
• 32 x 10/100/1000Mbps adaptive RJ45 ports and 4 x SFP Gigabit optical ports.
  Two SFP to RJ45 adapters included.
• Each RJ45 port supports MDI/MDIX auto flip and wire-speed forwarding functions.
• Ports 1-32 support Power over Ethernet and follows the IEEE802.3af/at standard.
• Can automatically detect and identify a power-receiving device
  and supply power to it through a network cable.
• Uses store-and-forward mode, combined with QoS technology, to ensure that
  the bandwidth is effectively allocated to each port.
• Provides stable and reliable power and data transmission for high-power AP,
  network cameras, PTZ network dome cameras, PoE lighting and other security
  monitoring equipment.
• 2 year warranty
• NDAA Compliant*

*Products are in compliance with NDAA Section 889 Part B Guidelines

POESPL

802.3at/af PoE Splitter

• Power non-PoE IP cameras via a PoE signal
  by splitting the signal into Ethernet and power
• POESPL can handle up to 20W 802.3at PoE power
• Ethernet speed up to 10/100MBPS
• 2 year warranty
• NDAA Compliant*

*Products are in compliance with NDAA Section 889 Part B Guidelines

POEINJ

802.3at/af PoE Injector

• Used in conjunction with Ethernet switch to power
